TECHNICAL NOTES

Statistical data in the Quarterly Economic Review are based on the latest available information, and several statistical tables are substantially up-dated and amended from time to time to reflect figures revised by respective sources.

Abbreviations used are:

e = Estimated

n.a. = Not yet available E = Estimated by Source n.e.i. = Not elsewhere included

p = Provisional

- = NiI r = Revised

.. = Negligible/AlmostR = Revised by Source

1. Executive Summary

The domestic economy continues to show growth, with the services sector accounting for most of the growth. Despite a generally weak agricultural sector for 2006, the September quarter has witnessed an increase in copra production, beef and kava production. Air Arrivals increased in the third quarter by 2.5 percent in the previous quarter, while day visitor arrivals increased by 68 percent from the previous quarter. Inflation for the year September 2006 indicated an increase by 2.9 percent, owing largely to fuel increases, electricity prices, food items and household supplies.

The central government overall fiscal operations depicted a deficit of VT227.8 million compared to a smaller deficit of VT38.0 million recorded during the corresponding quarter of 2005. The drop was accounted for by an increase in expenditures, due to increases in public servants salaries and wages.

Monetary growth decelerated during the third quarter of 2006, as broad money depicted a contraction in growth of almost 3.0 percent to reach VT44,434.9 million. In view of the determinants of money supply, the slow growth in broad money was attributed mainly to a contraction in the holdings of net foreign assets of commercial banks, resulting in a decline in overall net foreign assets. Domestic credit somewhat grew during the quarter.

Excess reserves have been vigorously increasing during the quarter, as the economy is persistently experiencing massive foreign exchange inflows through the process of balance of payments. The Reserve Bank of Vanuatu was also aggressive in its open market operation (OMO), with an increase in the level of RBV during the quarter. Short term interest rates currently depict an increasing trend. The weighted average interest rates on deposits and lending rates have declined given the high level of liquidity.

The Balance of payments figures for September quarter 2006 reflected an expansion of the official international reserves to 7.7 months of import cover from the 7.0 in June. The improving economic conditions and political stability had contributed a lot into this expansion. The Current account had reduced its deficit significantly this quarter, largely

due to improvements in the services account. Despite the level of deficits in the current account, financing was more than adequate.

World economic growth has continued to strengthen in 2006, although in the September quarter, although growth in the United States of America and Australia had softened. Growth in Euro zone continues to remain robust, while activity in Asia has remained resilient also. . A key element to the strong world performance is the extraordinary growth of emerging markets and developing countries. Global growth is projected to increase by 5.1 percent for 2006 before moderating to 4.9 percent in 2007.

Falling oil prices was essential for most economies in controlling inflation, although strength in domestic demand, coupled with capacity constraints has meant that strong underlying inflation still remain a possibility.

Despite earlier strong growth in the US economy in early 2006, activity has since moderated, with an advance estimate indicating that growth has slowed to 2.9 percent in the second quarter, from 5.6 percent in the first quarter. For the year as a whole, growth is projected at 3.4 percent, before slowing to 2.9 percent in 2007.

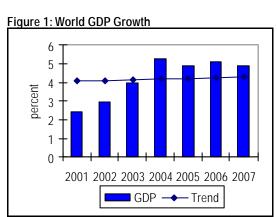

The Australian economy continued to grow in towards the end of 2006, with a forecasted growth of 3.1 percent and 3.5 percent for 2007. The second quarter figures point to a moderation in domestic demand from the first quarter, although it is still running at 3.5 percent to 4 percent over the year. Meanwhile drought conditions have brought on difficult agricultural conditions, although activity remains strong in resource rich states.

Real output growth in Europe is forecasted at 2 percent for 2007, compared to 2.4 percent in 2006. In the outlook two long-term trends are alarming: first, productivity growth in most European countries has declined in recent years and jeopardizes future competitiveness in a global market. Second, economic fundamentals among member countries of the Euro area are drifting apart particularly with regards to restructuring which vary from in objectives from country to country.

Japan's economy is slowly recovering from deflation and is expected to grow at 2.7 percent in 2006 and around 2.1 percent in 2007 while in China, Annualized GDP growth slowed slightly in the third quarter of 2006, but remained robust at 10.4 percent.

2. INTERNATIONAL DEVELOPMENT

The world economy continues to be strong, with a third year of above average growth. Growth in the United States and Australia has softened, activity in the Euro Zone has picked up, and while in Asia activity has generally remained resilient. A key element to the strong world performance is the extraordinary growth of emerging markets and developing countries. Global growth is projected to increase by 5.1 percent for 2006 before moderating to 4.9 percent in 2007.

Source: IMF World Economic Outlook, September 2006

Recently, falling oil prices have led to declines in headline inflation, although strength in domestic demand, coupled with capacity constraints has meant that strong underlying inflation still remain a possibility. Consequently, a number of Central Banks have since, raised official rates.

Figure 2: Selected Official rate changes

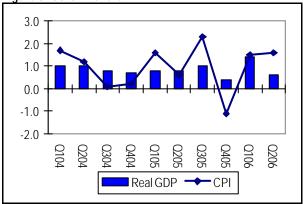

Central Bank	Net change in Policy rate since January 2006 [last move]	Current level of policy rate

The US Economy

Despite earlier strong growth in the US economy in early 2006, activity has since moderated, with an advance estimate indicating that growth has slowed to 2.9 percent in the second quarter, from 5.6 percent in the first quarter. Private consumption growth weakened against the background of higher interest rates, a cooling housing market, high gasoline prices, and lackluster employment gains. Business investment in equipment and software was also surprisingly weak, but net exports contributed positively to growth as imports slowed. For the year as a whole, growth is projected at 3.4 percent, before slowing to 2.9 percent in 2007.

Figure 3: US GDP and CPI

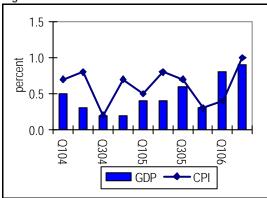

Europe

Recovery in the Euro zone has finally materialized in 2006. Corporate restructuring improved competitiveness and increased consumption and investment spending (particularly in France and Germany), contributing to the turnaround. Consumer confidence is robust. Real output growth is forecasted at 2 percent for 2007, compared to 2.4 percent in 2006.

.As a net oil importer, the outlook depends significantly on future crude oil prices. Similar to U.S. house prices, housing prices in Spain, France, and Ireland are still elevated and a rapid downturn could cool off the economy.

Figure 4: Euro area GDP and CPI

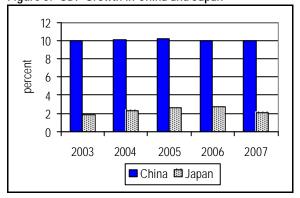

Two long-term trends are alarming: first, productivity growth in most European countries has declined in recent years and jeopardizes future competitiveness in a global market. Second, economic fundamentals among member countries of the Euro area are drifting apart. While countries like Germany and France effectively managed an economic restructuring toward higher value-added production, other countries like Italy or Spain have been less successful. Meanwhile labor costs have declined in Germany and to a lesser extend France since the introduction of the euro, there has been significant increases in Italy and Spain. Over the long run, this might undermine the commitment to the Euro currency because depreciation might be too tempting for populist policies.

The United Kingdom will do slightly better than continental Europe with an expected economic expansion of 2.7 percent. Job creation, consumption, and investment spending are robust and the economy expands around its potential output growth.

Asia

Japan's economy is slowly recovering from deflation and is expected to grow at 2.7 percent in 2006 and around 2.1 percent in 2007. The Bank of Japan has begun slowly redeeming excess liquidity and is expected to slightly increase interest rates in the year to come, although caution of a possible fallback into deflation looms. GDP growth in the September quarter of 2006 went up by 0.5 percent, owing largely to a strong external sector.

Figure 5: GDP Growth in China and Japan

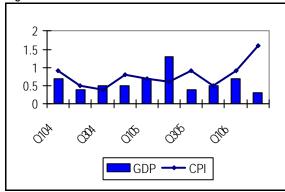

While there has been some moderation in investment in response to policy tightening measures by the People's Bank of China, consumption and net exports have remained resilient. China's current account surplus continued to rise in 2005 and the first half of 2006 and now accounts for some 70 percent of the regional surplus of about \$260 billion (annual basis). Annualized GDP growth slowed slightly in the third quarter of 2006, but remained robust at 10.4 percent.

Australia

The Australian economy continued to grow in towards the end of 2006, with a forecasted growth of 3.1 percent and 3.5 percent for 2007. The second quarter figures point to a moderation in domestic demand from the first quarter, although it is still running at 3.5 percent to 4 percent over the year. Real GDP growth over the 12 month period to June 2006 indicated a decline of 2 percent, yet employment has remained quite strong. Meanwhile drought conditions have brought on difficult agricultural conditions, although activity remains strong in resource rich states.

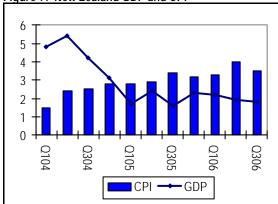

Figure 6: Australia GDP and CPI

New Zealand

Despite a recovery in the New Zealand Economy in early 2006 from 2005, it now appears to be occurring at a more gradual pace. Strength in domestic demand and the resulting pressure on domestic resources has seen non-tradable inflation lingering above 4 percent since 2004. Over much of 2006 New Zealand also experienced strengthening in tradable inflation due to high petrol prices. These combined conditions resulted in headline inflation rising to 4 percent in the year to June 2006.

Figure 7: New Zealand GDP and CPI

Global risks

High oil prices are the biggest risk for world economic activity in 2007. A rapid price increase would have significant ant negative effects for all oil importing economies.

Rising current account imbalances are a second concern for the world economy. The U.S. current account for the first six months of 2006 reached a

deficit of \$431 billion and will probably reach 7 percent of GDP at the end of the year, while other regions, such as emerging Asia, Japan, and oilexporting countries, further increase their current account surpluses.

Over the long run, this is not sustainable and unavoidable adjustments will be made. The question is how smoothly these adjustments will occur. A fast and significant depreciation of the U.S. dollar would not hurt the U.S. economy as much as it would hurt China and other big exporters to the U.S. market.

Private capital is increasingly fl owing from the developed world into emerging economies, causing the yield spreads of emerging countries' debt to decline. These low risk spreads seem—at least in some cases—unaligned with economic fundamentals. A financial crisis in one country could trigger an initial turnaround in worldwide capital flows.

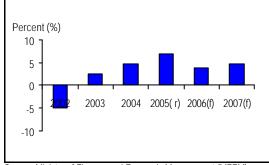

3. Domestic Economic Development

3.1. Real Economy

Economic activity continued to grow during the third quarter of 2006, with much of the growth being attributed to improved output in manufacturing, construction sectors, and a dominant services sector.

Similarly, the services sector accounted for 72 percent of the country's total Real GDP in 2005, followed by the Agricultural sector by 18 percent and the industrial sector by 10 percent.

Figure 8: GDP Growth Rate

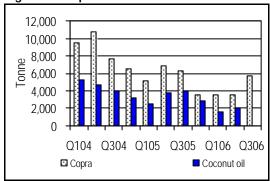

Source: Ministry of Finance and Economic Management (MFEM), National Statistics Office The consumer price index continues to show increases in the third quarter following on from an increase in the second quarter. Amidst rising world fuel prices towards the mid-year, inflation rate up to the quarter under review prevailed around 2.0 and 3.0 percent.

3.1a. Copra and Coconut Oil

Copra production during the quarter increased by 84 percent to 6,484 tonnes, from 3,516 tonnes produced in the second quarter, although the level of production is lower by 10 percent from the same quarter of 2005. The value of copra amounted to VT118.3 million, compared to VT63.7 million in the previous quarter. The increase reflected in part a slight increase in the average domestic price, from VT18,119 per ton to VT18,249 per tonne.

The average world price for copra increased from US\$383.0 per tonne in the second quarter to US\$400 per tonne during the reviewed quarter, whilst in the same quarter of 2005 the average price was US\$380.7 per tome. Despite the increase, world prices remain low compared to 2005 prices.

Figure 9: Copra & Coconut Oil Production

Source: VCMB, National Statistics Office

There was no coconut oil export over the third quarter following the closure of the major coconut oil mill, Occonut Oil Production Vanuatu Limited (COPV) in Santo. Export of coconut oil in the third quarter was mainly from stock after the closure. Other coconut oil producing companies such as the VCMB (Vanuatu Commodities marketing Board) owned coconut oil mill, VCPL (Vanuatu Coconut Products Limited), although much of the oil is targeted towards producing bio fuel domestically.

In line with the increase in the average world price for copra, coconut oil prices also increased from US\$578.7 per tonne in the previous quarter to US\$599.1 per tome as compared to the \$ US571.7 per tonne in the third quarter.

3.1b. Cocoa

Total cocoa production amounted to 378 tons over the third quarter, recording a drop of 42 percent from 653 tonnes in the previous quarter and lower by 29 percent over the same quarter of last year. Production varies with seasonality which showed high produce towards the mid-year. The total value of cocoa production though, increased from VT58.3 million (revised from VT10.9 million) to VT35 million during the September quarter. Average producers price increased from VT89,225 per tonne in the previous quarter to VT93,104 per tonne. The average world price for Cocoa also increased from 158.4 Cent per Kg to 162.3 US Cent per Kg.

3.1c. Kava

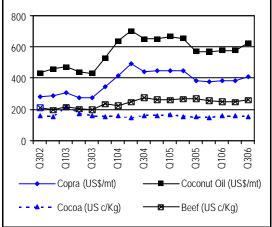

While data were available, preliminary Kava exports was estimated to increase by 20 percent from 167 tons in the previous quarter to 200 tons. Over the same period in 2005, production was lower by 22 percent; however rising domestic prices are expected to boost production in 2006.

3.1d. Beef

Beef production increased in the third quarter, resulting from an increase in domestic demand during the independence celebration festivities in July. Production increased from 538 tons produced during the second quarter to 895 tons in the reviewed quarter, representing a growth of 66.4 percent and 4.9 percent growth over the same period of last year respectively.

In terms of world price, the average price of beef increased from 247.3 US Cent per Kg to 257.4 US Cent per Kg during the September quarter. Price remain about the same level as in 2005 as see the previous year.

3.1e. Tourism

Tourism arrivals for both air arrivals and cruise-ship arrivals showed increases in the third quarter of 2006

Air arrivals increased by 24 percent to 18,712 visitors compared to 15,144 visitors in the second quarter. There was also an increased by 15.7 percent from 19,445 day visitors in the previous quarter to 22,506 visitors in the third quarter, owing largely to an increase in the cruise ship arrivals. Holiday visitors along, accounted for 76 percent of total air visitor arrivals which showed growth of 23.6 percent from the previous quarter and 1.3 percent

total air visitor arrivals which showed growth of 23.6 percent from the previous quarter and 1.3 percent over the same quarter of 2005. The average hotel room occupancy rate increased slightly from 56.6 percent to 58 percent in the third quarter.

3.1f. Inflation

Projected annual increase in CPI for the third quarter of 2006 is projected to increase by 1.2 percent from the previous quarter or 2.9 percent over the same quarter of 2005. Port Vila and Luganville showed increases of 1.2 percent and 1.1 percent respectively. Major expenditure groups contributing to this quarter-to-quarter increase are Transport & communication (0.7%), Housing Utilities (0.5%) and food (0.5%). Other notable increases are in Drinks & Tobacco (0.1%), Housing Supplies (0.1%) and recreational, Education, Health, etc (0.1%) while clothing and Footwear expenditure group indicate to a decline of 0.3 percent.

Figure 13: Inflation rate

Source: National Statistics Office

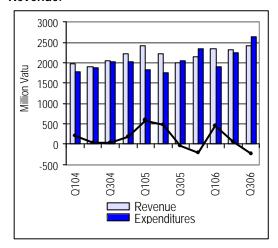

3.2. FISCAL OPERATIONS

Despite the Government operating a positive account with the Reserve Bank of Vanuatu, a budget deficit was incurred for the quarter under review. Net claims on Government (NCG) with the commercial banks had deteriorated slightly due mainly to transfer of funds to the Reserve Bank. This had resulted with improve NCG with the Reserve Bank, reflecting high deposits maintained by the Government in its operating accounts.

The central government overall fiscal operations deficit of VT227.8 million was higher compared to a deficit of VT38.0 million recorded during the corresponding quarter of 2005. The decline in the

fiscal position for this quarter stemmed mainly from the increase in expenditures, resulting from the implementation of the Government remuneration tribunal (GRT) decision to increase public servants salaries and wages. The GRT decision is having an immediate impact on Government budget by increasing expenditures.

Figure 14: Government Expenditures and Revenue.

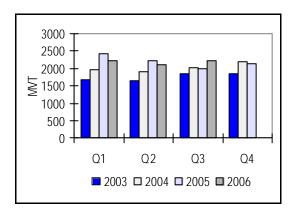

3.2a. Revenue

Revenue including grants received for the quarter under review amounted to VT2414.9 million. Collection of revenue increased by 4.8 percent in the previous quarter and by 20.2 percent, compared to the level attained in the corresponding quarter of 2005.

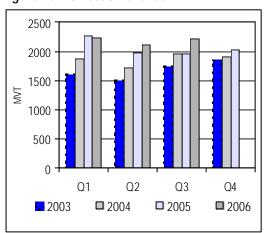

According to Budget, Revenue up to September accounts for 81.1 percent. The improved performance reflects on improving economic conditions and compliance by Government departments.

Figure 15: Total Revenue and Grants

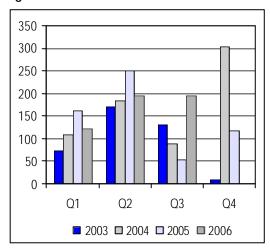

Taxes constituted 5.8 percent of total recurrent revenue, having increased by 14.1 percent compared the same quarter of 2005. VAT collection had also improved by 2.1 percent, while import duties increased by 12.2 percent over the corresponding quarter of 2005. The improved trend in collection is expected to continue into the fourth quarter.

Figure 16: Domestic Revenue

Non tax revenue increased by 67.5 percent and by 10.2 percent from the level attained in the previous quarter and the same quarter of 2005 respectively. Total non tax revenue collected for the three quarters of this year had exceeded the level collected for the same period of 2005 by 2.9 percent.

Figure 17: Grants

Gants received for the review quarter totaled VT195.3. Grant aid received for the nine months of this year had rose to VT514.1 million, which is VT50 million higher than the level received for the same period in 2005. More grant aid is expected to flow in during the fourth quarter with Millennium Challenge Account (MCA) funds also expected in early next year 2007.

3.2b. Expenditures

Total expenditures for the review quarter had increased by 18.1 percent from the previous quarter, and similarly by 29.1 percent compared to the corresponding quarter of 2005.

Expenditures to date totaled 75.7 percent of the budget, which is slightly above the allocation for this time of the year.

Salaries and wages increased by 21.2 percent in comparison the corresponding quarter of 2005. This increase is attributed to the implementation of the government remuneration tribunal decision to increase the salary and wages of civil servants under the public service commission. The increase in salary and wages bill is expected to culminate in an overall increase in total expenditures for 2006.

3.2c. Financing

At end September 2006 the Government incurred a fiscal surplus of VT283.9 million. Continuous tight fiscal control by the Department of Finance meant that had ensured sustainability in the surplus. Given the situation, the Government had not resorted to

the overdraft facility with the Reserve Bank of Vanuatu.

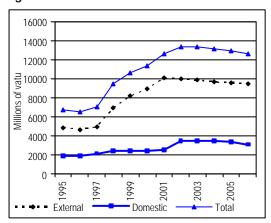

Two of the main instruments commonly utilized by the central government to finance its deficits are domestic borrowing and the overdraft facility with the Reserve Bank.

3.2d. Outstanding Government Debt

Total outstanding public debt was estimated to be approximately VT12.6 billion, of which 24.6 percent is domestic debt. The last external debt to be taken up by the Government was in 1998 and domestic debt in terms of bond holding in 2003.

Domestic debts in terms of bond holding and domestic loans has been reduced to VT3,103.0 million, when VT225 million was retired. From the total bond holding, corporate bodies have a share of 49.3 percent, the RBV 27.8 percent, commercial banks 22.8 percent, and others 0.1 percent.

Figure 18: Public Debt

Total external debt of the country stood at approximately VT9,491.1 million and representing 75.4 percent of total public debt. Total estimated outstanding public debt represents 30.7 percent of nominal GDP. The Government is weary to undertake any more debts, given the high amount of domestic debt that will mature in 2008.

3.3 MONETARY DEVELOPMENTS

Monetary growth decelerated during the third quarter of 2006, as broad money contracted by 3.0 percent to reach VT44,434.9 million. This decline was in contrary to increases of 5.5 percent recorded over the previous quarter and the previous years level, respectively. h view of the determinants of money supply, the slow growth in broad money was attributed mainly to a contraction in the holdings of net foreign assets of commercial banks, resulting in the decline in overall net foreign assets. Domestic credit somewhat grew during the quarter.

The level of Commercial Banks liquidity¹ continued to remain high above expectations during the quarter. Excess reserves have been vigorously increasing during the guarter, as the economy is persistently experiencing massive foreign exchange inflows through the process of balance of payments. Amid the considerable level of excess liquidity, the Reserve Bank of Vanuatu was also active in its open market operation (OMO), with an increase in level of RBV notes issued. With the uptrend in liquidity, Short term interest rates were expected to dampen, however, the reverse has been observed. The high interest rates reflects the fact that Banks have reached their sovereign limit in terms of their holdings of securities, and in an effort to minimize risks they have opted to increase bids short-term notes. Meanwhile, weighted average interest rates on deposits and lending rates have declined reflecting the substantial level of liquidity in the system during the quarter.

3.31. Determinants of Money Supply

3.31a. Net Foreign Assets

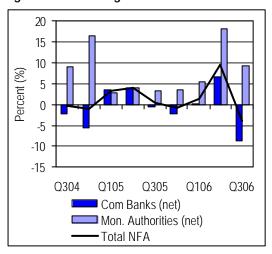

Following an expansion recorded over the previous quarter, total net foreign assets (NFA) of the banking system declined by 3.8 percent during the reviewed quarter. Since commercial banks NFA account for almost 70 percent of the overall net foreign assets, the decline of 8.8 percent in the commercial banks holdings of NFA impacted on the overall decline in NFA. The NFA position of the

¹ Commercial banks liquidity consists of commercial banks excess reserves and holdings of RBV notes.

monetary authorities, however, expanded by 9.2 percent during the quarter. Overall net foreign assets noted a year-on-year growth of almost 6.0 percent.

The net foreign assets position of the Reserve Bank of Vanuatu has been expanding for the third consecutive quarter in 2006, with foreign exchange inflows above expectations. During the reviewed quarter, major inflows of foreign exchange were received by way of the Government in official grants, a few bilateral deals, and RBV Investment income. These inflows outweighed the outflows through government debt services and foreign exchange sales from the Reserve Bank of Vanuatu. As a result of these massive inflows, the months of import cover was equivalent .65 months of import cover. The Reserve Bank's net foreign asset position expanded substantially by 40.8 percent compared with the previous year.

Figure 19: Net Foreign Assets

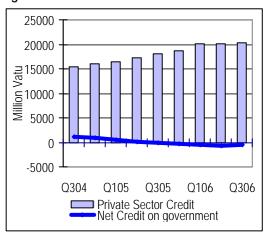

The level of net foreign assets held by the rest of the banking system contracted, due to a fall in their holdings of foreign assets held with their head offices abroad or overseas branches of bank by 5.8 percent. Likewise, foreign liabilities of commercial banks in terms of balances to other non residents increased by 10.0 percent, having contributed to this decline. Part of the decline was also caused by the downward movement in residents' foreign currency deposits during the quarter. On an annual basis, Commercial banks net foreign assets contracted by 4.9 percent, signifying a decline in

net foreign assets for the rest of the banking system over the year.

3.31b. Domestic Credit

Domestic credit growth was moderate during the quarter; however an annual growth rate of 10 percent was recorded. The moderate growth in domestic credit was due to upward movements contributed by its components. Net claims on the government vis-à-vis the banking system increased, and likewise, the banking systems claims to various institutions such as non-financial public enterprises, municipalities and private sector also increased.

Figure 20: Domestic Credit

Following improvements in the previous two quarter, the government's net lending position visa-vis the banking system deteriorated during the reviewed quarter. This resulted in an increase by 22.4 percent in the government's net credit position with the banking system, reflecting the drawdown on government deposits within the banking system to finance its expenditures. Consequently, government deposits with the Reserve Bank of Vanuatu also decline by 4.0 percent from the previous quarter.

The government has recorded a budget deficit during the quarter as a result of a general increase in the public servants wage bills during the month of August. Despite the deterioration during this quarter, the governments' overall net lending position has been consistently improving

throughout the nine months of 2006 as compared to the previous year's trend.

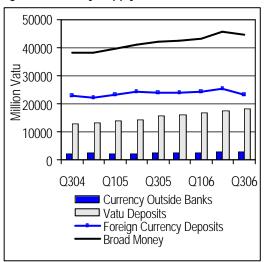

Credit extended to the private sector remained sluggish during guarter with a growth rate of 0.7 percent. Despite this, the volume of credit extended was higher by 12.3 percent compared to the level recorded in to the corresponding quarter of 2005. With regards to the credit distribution by sector, lending to the agriculture sector increased by 6.9 lending manufacturing and percent, while entertainment/catering sectors equally at 1.0 percent, respectively. Lending to Financial Institutions increased by 2.6 percent, while professional and other services increased by 6.0 percent. The transport sector noted a substantial increase in growth of 114 percent. This increase was purposely due to increase in credit for sea transport. In terms of lending for personal requirements, housing and land loans noted an increase of 3.5 percent.

Personal sectors continued to dominant the share of total loans. Housing and land loans consumed the largest share of 25.06 percent of total loans; this recorded an increase of 0.46 basis points from the previous quarter. Other personal loans claimed the second largest share of 16.45 percent though it declined by 1.45 basis points from the second quarter. Tourism sector maintained the third largest share of 11.3 percent, while construction sector supersedes the distribution sector which usually maintained the fourth position to attain the fourth largest position of 10.72 percent.

3.31c. Components of Money Supply

The contraction in money supply growth during the quarter was attributable to declines in both the narrow and quasi-money.

Figure 21: Money Supply

After recording an expansion during the previous quarter narrow money contracted slightly by 0.2 percent during the September guarter. downtrend was contributed principally by a 7.3 percent decline in demand deposits denominated in foreign currency. Alternatively, demand deposits denominated in local currency grew by almost 7.00 percent. These offsetting movements were partly due to a) residents converting their demand deposits in foreign currency for local currency to cater for domestic economic transaction and b) residents are utilizing their demand deposits in foreign currency to accommodate for overseas transactions, notably imports which recorded an increase during the quarter. Currency outside the banking system expanded further by almost 7.0 percent during this quarter. This trend may be possibly related to: a) disbursement of Government soft loans to various institutions during the guarter and b) increase in the public servants wage bills during August which increase their purchasing power and c) residents hoarding currencies to cater for immediate transactions. Despite the decline in narrow money during the quarter, money has been continuously flowing into the economy as indicated by a 10.5 percent growth in narrow money from the previous year's level.

Quasi-money also contracted by 4.1 percent during the quarter. This trend was attributed principally by time and savings deposits denominated in foreign currency. Time and savings deposits denominated in the local currency on the

other hand increased by 3.0 percent. This offsetting development would be partly due to residents transferring part their long term deposits in foreign currency to national currency or withdrawing their foreign currency deposits to investing in other portfolio investment earning greater returns. Despite this decline, quasi money expanded by 3.0 percent over a year ago.

3.31d. Deposits with Commercial Banks

In concordance with a downtrend in money supply growth, residents total deposits (exclusive of Government deposits) held with commercial banks recorded a decline of 3.4 percent to reach VT41.4 billion during the reviewed quarter. Despite this quarterly decline, the current level of deposits was almost 5.00 percent higher than that recorded over the corresponding quarter of 2005. As yet foreign currency deposits with commercial banks continued to attain the leading share of 56.1 percent in total deposits, while Vatu deposits acquire the remaining share of 43.9 percent.

Taking into account the ownership of deposits of customers, Individuals continued to maintain the bulk of deposits with a 43.7 percent share, private businesses acquire the second largest share of 42.9 percent, and non-financial public enterprises grasp 8.0 percent of total share, and others category with 5.3 percent. Municipalities attained the least share of 0.1 percent.

3.31e. Interest Rates

Deposit interest rates of commercial banks were somewhat lessen this quarter as compared to the previous quarter. For Fixed deposits the interest rate ranges for the one month maturity was shift downwards from 2.00-6.00 percent to a new range of 1.75-5.50 percent. For the 2-6 months maturities scope moved from 2.00-6.50 the interest rate percent during the previous quarter to a latest range of 1.75-5.00 percent. For maturities of deposits above six months, the upper interest rate limit was reduced by 1.00 basis points to 2.75-5.50 percent. The downward interest rates variations on various maturities of fixed deposits triggered overall weighted average deposits to be reduced from 5.20 percent to 4.71 percent during the quarter. Interest rates on savings deposits were maintained at range

of 0.50-2.00 percent. The reduction in the weighted average rate of interest on fixed deposits resulted in a decline in the weighted average rate of interest for total bank deposits from 2.38 percent during the previous quarter to 1.92 percent during the reviewed guarter.

Though the upper and lower interest rates limits were maintained during the quarter, the weighted average interest rates on loans and advances to various sectors of the economy were reduced from 11.65 percent to 10.86 percent. The downtrend in interest rates during the quarter reflected the current excessive liquidity experienced within the banking system. The interbank rates were maintained at 5.50 percent.

3.31f. Interest Rates Spread

The consequences of a decline in the weighted average rate of interest on both the lending and deposits interest rates prompt the overall interest rates spread to narrow from 9.27 percent in the previous quarter to 8.94 percent during the September quarter.

12 10 12 10 8 8 6 4 2 0 Q304 Q105 Q305 Q106 Q306

Figure 22: Interest Rate Spread

3.31g ReserveMoney

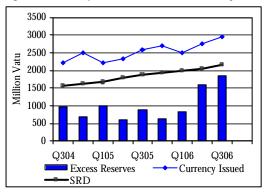

Growth in Reserve money² was sustained during this quarter, as it recorded an 8.9 percent increase from the previous quarter. In comparison to the corresponding quarter of 2005, the current level of reserve money was exceptionally higher by 30.6

² Reserve Money comprises of currency in circulation, Statutory Reserve Deposit (SRD) and Excess Reserves.

percent. The growth during the quarter was attributed to all its components, of which currency outside banks rose by 6.9 percent, excess reserves, 16.6 percent and SRD, 5.0 percent.

The current build up in excess reserves of commercial banks continue to reflect massive inflows of foreign exchange though the balance of payments during the quarter. These effected growth in commercial banks local currency deposits and demand deposits in foreign currency as indicated in the growth in SRD.

Figure 23: Components of Reserve Money

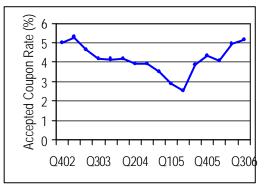

3.32 DOMESTIC MARKET DEVELOPMENT

3.32a. Open Market Operation

The continuing liquidity overhang in the domestic banking system during the quarter has prompted the Bank to increase the volume of its open market operations to VT1,972 million, compared to VT1,630 million in the previous quarter. The allotment in terms of maturities are as follow; VT50 million to 14-days, VT525 million to 28-days, VT595 million to 63-days, VT474 million to 91-days and VT320 million to 119-days. The total RBV notes outstanding stood at VT1,284 at the end of the quarter compared to VT990 million at the end of the previous quarter.

Figure 24: 91-days RBV Notes Yield

The yields on RBV notes also continue to remain high during the quarter despite the high banking system liquidity. The high rates partly reflect the slow down in lending activities of the commercial banks, thereby higher rates partly assist in subsidizing the cost of holding money. The average weighted Yield on all RBV notes continue to increase with the yield on 91-days maturity increased to 5.18% compared to 4.95% at the end of previous quarter.

3.4. FINANCIAL DEVELOPMENT

3.41. Total Local Expenditures

Total estimated local expenditures of Finance Centre institutions had ecorded a decline of 3.6 percent from the previous quarter and increased by 16.8 percent from the corresponding quarter of 2005. This decline was attributed to decreases of 8.7 percent in total recurrent expenditures and 37.0 percent in total taxes and levies from the previous quarter.

From the estimated total local expenditures of VT952.6 million, the banking sector continue to dominate with 47.4 percent, followed by trust and insurance companies with 30.3 percent, accounting firms with 14.6 percent and legal firms and offshore institutions with 7.7 percent.

Total estimated taxes and levies paid by Finance center institutions and other private companies, decreased by 37.0 percent from the previous quarter. The bulk of this decline comes from

central government fees which registered a decrease of 36.8 percent from the previous quarter.

There was an increase in total estimated capital expenditures of finance institutions and other private sector institutions by 88.7 percent and 47.5 percent from the previous quarter and the corresponding quarter of 2005, respectively. The bulk of this increase comes from trust and insurance companies when compared to the previous quarter.

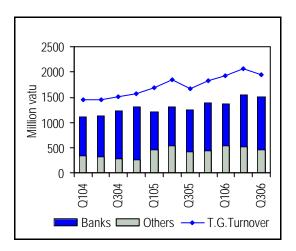

Estimated Value of total assets of Finance Centre and other private sector institutions decreased by 2.5 percent from the previous quarter. An increase of 0.05 percent was recorded for the corresponding quarter of 2005.

The total estimated number of employees recorded a new increase of 626 after declining to 619 during the previous quarter. Ni-Vanuatu employees made up approximately 88.5 percent of this total.

3.42. Total Gross Turnover

Total estimated gross earnings of Finance Centre Institutions decreased by approximately 5.4 percent from the previous quarter. An increase of 16.8 percent was recorded when compared to the corresponding quarter of 2005. The decline in estimated total gross earnings of finance center institutions was attributed to decreases in earnings on commercial banks by 2.9 percent, gross income of trust and insurance companies by 6.25 percent and gross income of accounting and legal firms by 22.1 percent from the previous quarter.

Figure 25: Total Gross Turnover (Finance Centre Institutions)

Total estimated net foreign exchange earnings decreased by 8.0 percent from the previous quarter. An increase of 82.7 percent was recorded when compared to the corresponding quarter of 2005. This decline was attributed to decreases of net foreign exchange earnings of trust and insurance companies by 16.6 percent and net government's foreign exchange receipts from exempt institutions by 72.7 percent from the previous quarter.

3.43. Shipping Registrations

The number of ships on the registry at quarters end remained unchanged at 586 vessels, compared to 601 recorded during the corresponding quarter of 2005. This is attributed to the addition of 8 new ships to the registry, while 8 ships de-registered.

Net shipping fee figures for the reviewed quarter recorded an increase of 77.8 percent increase from the corresponding quarter of 2005 and 17.1 percent increase from previous quarter.

There were slight increases in both gross and net tons. The average sized vessel at the registry remains at just over 4,800 gross tons.

3.44. Company Registration

The Vanuatu Financial Services Commission (VFSC) recorded a total of 6,285 companies for the review quarter. This represents a net increase of 94

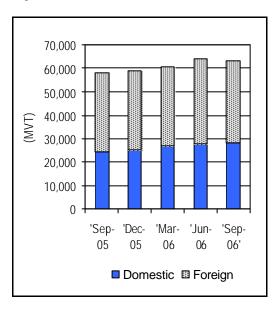

companies and 106 companies from the previous quarter and corresponding quarter of 2005, respectively. The increase in company registration for this quarter was attributed to the registration of 130 companies, while 21 companies de-registered with the VFSC.

From the total number of companies, international companies represent 74.5 percent, local companies made up 23.4 percent, while exempt and overseas companies accounting for 2.1 percent.

3.44 DOMESTIC INDUSTRY ANALYSIS

3.44a. Balance Sheet

Figure 26: Asset Position – Domestic Banks

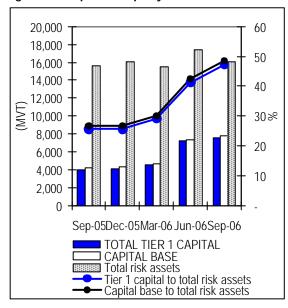

The industry's balance sheet recorded no significant movement over the last quarter. Total assets decreased slightly down 1.0 percent to Vt63.6 billion (Vt64.2 billion: Jun-06). The decrease is mainly attributable to a decline in foreign assets by 3.8 percent to Vt35.2 billion (Vt36.6 billion: Jun-

³ Companies incorporated under the international Companies Act and do not operate business in the country.

06). Domestic assets on the other hand increased by 2.7 percent to Vt28.4 billion from Vt27.7 billion in the previous quarter.

The industry's total liability (less capital) decreased slightly down 1.2 percent to Vt56.9 billion (Vt57.6 billion: Jun-06). The decrease mainly reflects a decline in domestic liabilities by 3.0 percent to Vt43.6 billion (Vt45.0 billion: Jun-06). Foreign liabilities on the other hand rose by 5.4 percent to Vt13.3 billion (Vt12.6 billion: Jun-06) over the last quarter.

Figure 27: Capital Adequacy & Tier 1 Ratio

The industry continued to record further growth in its capital base over the last quarter. As of end September 2006, the industry's capital base stood at Vt7.8 billion (Vt7.4 billion: Jun-06); an increase of 5.3 percent over the previous quarter. The increase is driven from growth in disclosed reserves and retained earnings by 6.4 percent to Vt6.7 billion (Vt6.3 billion: Jun-06).

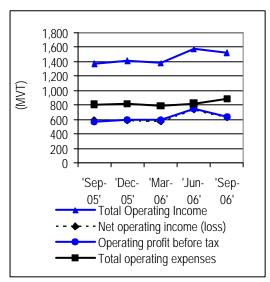

The ratio of capital base to total risk assets rose from 42.4 percent (Jun-06) to 48.5 percent during the reviewed quarter. Tier 1 capital to total risk assets also increased to 47.3 percent from 41.3 percent during the June 2006 quarter. The increase in the industry's capital adequacy ratios' resulted to a downward movement in total risk assets by 7.9 percent to Vt16.0 billion (Vt17.4 billion: Jun-06).

⁴ Companies registered or re-registered as exempt companies and do business overseas.

⁵ Companies incorporated outside Vanuatu and do business in the country.

The industry's quarterly operating profit (before tax) was down by 15.2 percent to Vt633.5 million from Vt747.2 million in the previous quarter. The decline was mainly attributable to a decrease in net interest income by 10.8 percent to Vt605.3 million (Vt678.8 million: Jun-06) and an increase in operating expenses by 9.9 percent to Vt418.2 million (Vt380.5 million: Jun-06).

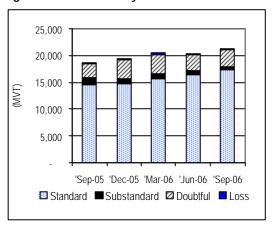

Figure 28: Earnings - Domestic Banks

As a result of a 16.1 percent increase in provisions to Vt20.8 million (Vt17.9 million: Jun-06) and an increase in bad debts recovered from Vt2.5 million (Jun-06) to Vt12.6 million, the industry reported a drop of 14.6 percent in net operating income to Vt625.3 million (Vt731.9 million: Jun-06).

The industry's Return on Asset (ROA) and Return on Equity (ROE) also dropped from 1.2 percent (Jun-06) to 1.0 percent (Sept-06) and from 11.4 percent (Jun-06) to 9.5 percent (Sept-06) respectively.

Figure 29: Asset Quality - Domestic Banks

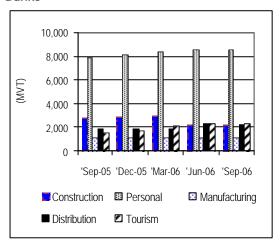

Total lending of the industry increased slightly over the last quarter, up 5.2 percent to Vt21.3 billion (Vt20.3 billion: Jun-06). This comprised mainly of standard loans which accounted for 81.1 percent (Vt17.3 billion), substandard loans 2.5 percent (vt531.0 million), doubtful loans 15.3 percent (Vt3.3 billion) and loss loans 1.0 percent (Vt222.9 million) of total loans respectively.

The industry's level of impaired assets has increased over the quarter by 13.6 percent to Vt3.5 billion (Vt3.1 billion: Jun-06). The increase mainly reflects the reclassification of substandard loans to doubtful loans over the quarter. As a result, substandard loans fell by 35.0 percent whilst doubtful loans increase by 12.9 percent over the quarter. Impaired asset accounted for 45.1 percent of total capital up from 41.8 percent in the last quarter.

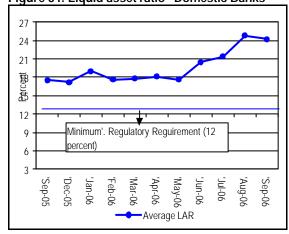

The increase in the industry's impaired assets over the quarter has lead to an increase in specific provisioning by 3.8 percent to Vt905.4 million (Vt872.4 million: Jun-06) and security held by 8.9 percent to Vt12.5 billion (Vt11.5 billion: Jun-06). General provisioning on the other hand declined by 12.9 percent to Vt29.1 million (Vt33.4 million: Jun-06).

Figure 30: 5 Largest Sector Claims Domestic Banks

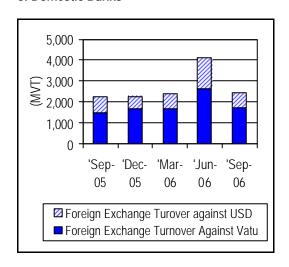

The industry's five largest sectoral lending is geared towards personal loans representing 41.5 percent (Vt8.5 billion), tourism 11.3 percent (Vt2.3 billion), distribution 11.3 percent (Vt2.3 billion), construction 10.7 percent (Vt2.2 billion) and manufacturing 5.5 percent (Vt1.1 billion) of total sectoral lending.

Figure 31: Liquid asset ratio - Domestic Banks

The industry's level of liquidity as expressed as its liquid asset ratio (LAR) continues to improve and remained well above the regulatory requirement. As of end September 2006, the industry's LAR was recorded at 24.2 percent up from 20.5 in the previous quarter.

Figure 32 Foreign Exchange TurnoverPositions of Domestic Banks

The industry's foreign exchange turnover position over the quarter ending September 2006 dropped by 40.6 percent to Vt2.4 billion (Vt4.1 billion, Jun-06). Of this total foreign exchange turnover against the Vatu currency accounted for 70.8 percent (Vt1.7 billion), whilst foreign exchange turnover against the USD currency accounted for 29.2 percent (Vt713 million) of total foreign exchange turnover recorded over the period under review.

3.44b. International Banks

Overview

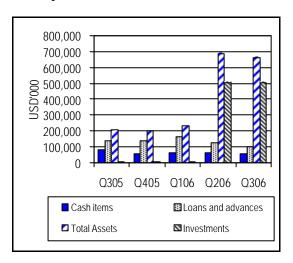

The Bank, as part of its supervisory role, continues to ensure that the industry continues to operate in a prudent and sound manner. The Bank through the off-site and on-site supervision ensures that the banks uphold the law while conducting international banking business.

Balance Sheet

September 2006 quarter showed a slight decrease in the industry's balance sheet footings of 3.89 percent to USD661.6 million (USD688.4 million: June-06). The decrease was mainly attributable to drop in inter bank loans and advances by 25.79 percent to USD77.9 million (USD105 million: June-06)

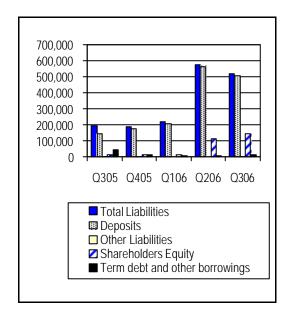

The major components of the industry's assets currently are investments consisting of 76.25 percent to USD504.5 million. (Refer figure 1).

Figure 33: Total Asset – International Banking Industry

On the liability side, the industry's total liabilities (excluding shareholders equity) also decreased by 9.89 percent to USD518.0 million (USD574.8 million: June-06). The decrease is mainly attributable to decrease in deposits by 10.4 percent to USD504.3 million (USD563.04 million: June-06). The decrease in deposits is mainly attributable to drop in Corporation deposits by 11.77 percent to USD417.9 million (USD473.7 million: Jun-06). The major components of liabilities are deposits from corporations, which accounted for 76.2 percent of total liabilities and shareholders equity.

Figure 34: Total Liabilities – International Banking Industry

Earnings

The industry recorded a net profit of USD31.01 million for the reviewed quarter. This is a decrease of 69.3 percent from the June 2006 quarter (USD100.9 million). The decrease is attributable to fall in non-interest income earnings by 69.2 percent to USD30.96 million (USD100.6 million: June-06). Refer to figure 3.

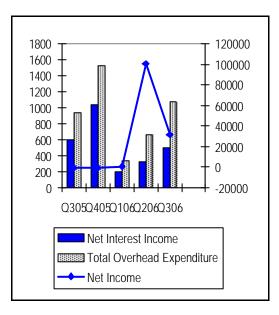

The industry's ROA and ROE for the September quarter are; 0.05 (0.15 Jun-06) and 0.24 (June-06, 0.89) respectively over the period.

_

⁶ Net income is divided by average total assets of Jun 06 & Sept 06 quarters

⁷ Net income is divided by average total equity of Jun 06 & Sept 06 quarters

Figure 35: Income – International Banking Industry

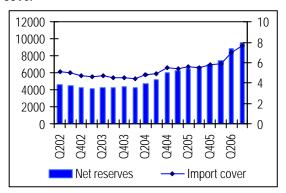

3.5 BALANCE OF PAYMENTS

Development in the Balance of payments for September quarter 2006 was reflected in the expansion of the official international reserves to 7.7 months of import cover from the 7.0 in June. The improving economic conditions and political stability had contributed a lot into this expansion. One of the key indicators of monetary stability for the country is the maintenance of the minimum target level of 4 months of import cove, the Reserve Bank has been monitoring such indicators very carefully though its policy objectives and implementations

The Current account had reduced its deficit significantly this quarter, largely due to improvements in the services account. Despite the level of deficits in the current account, financing was more than adequate.

Figure 36: Net Reserves and months of import cover

Merchandise trade

The provisional trade deficit was expanded by 0.6 percent in the review quarter. Exports record a decrease of 19%, offsetting decrease in the value of imports. Earnings from kava, beef and copra increased while timber, cocoa and coconut oil dropped. It is projected that coconut oil exports may reached zero level next quarter due to lack of stock to be exported, however coconut oil exports for early 2007 is anticipated to recommence. Most import

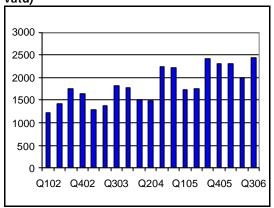

Items decreased during the quarter and the overall trend for imports is an upsurge slope and is expected to continue with this trend in the future.

Services Account

Inward travel or tourism earnings are the main source of surplus of the services account. The surplus in net services rose by 24 percent in September reflecting a significant increase in

In travel and financial services, services payments marginally expanded stemmed from an expansion in business services. It is important to note that the appreciation of the Australian dollar against the Vatu in September could have contributed to the 22 percent rise in tourism earnings as Australia continues to rank first in tourist country of origin.

Figure 37: Tourism Earnings (in millions of vatu)

Income Account

Movements in world interest rates also have impacts on the investment income account of Vanuatu. Investment on AUD and NZD have yield well in September given the attractive interest rates of the two currencies. Vanuatu income receipts rose by 20% in the review period reflecting excellent portfolio choices of investment.

Nevertheless, Vanuatu's net foreign income account is deficit in nature, mostly represented by foreign enterprise's large reinvested earnings., investment income through foreign direct investments contracted 30 percent as compared to the 9 % up in June of which most came though fresh investments

Current Transfers Account

As a large proportion of current transfers represent official grant flows, the level is driven by donor grants to the Government of Vanuatu. Total estimated grants for September quarter was marginally higher than last quarter reflected by the significant increase in aid in cash. Other official transfers were low reflecting periods of payments though the Government shipping registry, while private sector was low.

Capital and Financial Account

Estimated capital account for this period saw a decrease in project goods. It is projected that aid in kind for capital related goods will be high in 2007 when the Millennium Fund projects commence.

Continuous net outflows of migrant's transfers continue to be recorded. It is important to note that information on estimate migrant's transfers is derived from a model.

The Financial account record flows of transactions through external assets and liabilities. In September quarter, a substantial decrease in foreign direct investment was recorded both in terms of fresh investments and reinvested earnings. This item was high in June caused by huge capital inflow for fresh investments.

Large increase in the withdra wal of foreign assets was recorded in other investment assets, in particular currency deposits and loans while liabilities recorded an increase in non residents' deposits which could not offset large decrease in other types of securities.

Medium Term outlook

In medium term (2006/2007), the current account is expected to improve. Imports will continue to grow, reflecting expansion of the economy as large amount of capital investment are injected into capital projects. The projected improvement in tourism earnings in 2006 and 2007 will continue to provide a boost to the services account while reinvested earnings of foreign enterprises will continue to create deficits in net factor income. The capital and financial account is forecasted to continue in surplus into the medium term. Barring adverse unforeseen circumstances, official international reserves are therefore expected to remain healthy at around 8 months of import cover at end 2006 and 6 months in 2007.

International Investment Position

By end September 2006, Vanuatu's International Investment Position (IIP) expanded its net borrowing position to VT11126 million, from VT11107 million last quarter. The new position reflected a reduction in assets more than liabilities. (The net IIP data for last quarter was revised).

Exchange Rates

The developments of global capital markets have impacted a lot on the movement of the US dollar against other major currencies. The large US budget and current account deficit remain the key

QUARTERLY ECONOMIC

reasons behind expectations for a long term dollar weakness. This has impact on the exchange rate currencies among our trading partners and the vatu vis-a vis the currencies of its major trading partners.

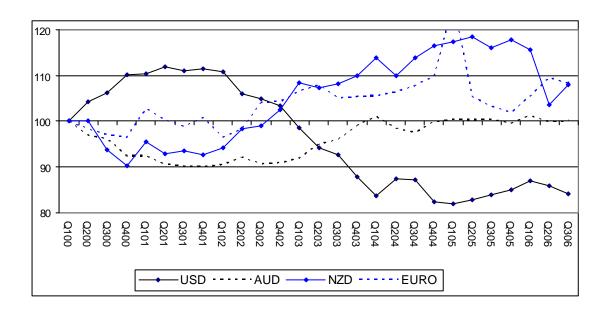

.

The table below is the result of exchange rate movements over the quarter and over the year from September 2005. Developments over the quarter saw the Vatu depreciated against the US dollar (1.71%), Aussie dollar (-1.0%), Japanese Yen (-3.8%) and Euro (1.4%). In the same period the Vatu appreciated against British Sterling (STG) (6.6%), New Zealand dollar by 11.5 percent.

Development over the year showed that the Vatu appreciated against the New Zealand dollar and Euro, while it depreciated against the US dollar, British Sterling and Australian dollar.

CHRONOLOGY OF MAJOR EVENTS

NO. BRIEF DESCRIPTION OF EVENTS

EFFECTIVE DATE

1. Fruit farmers have an opportunity to earn good money from pomelo or grapefruit (pomplemus) exports to niche markets in New Zealand now that the Quarantine Service has confirmed New Zealand Quarantine Service has given the nod that like Tahitian Lime, our grape fruit is free of frit fly infection. VQS said another export of 1.2 tons of grape fruit left for New Zealand last Saturday. VQS has used the assistance of Vanuatu Fresh Facility, a private company to process and certify all products before they can be exported.

(Vanuatu Daily Post, 12th July 2006)

12 July, 2006

1. The Minister for Ni-Vanuatu business has launched the first-ever constitution of the Ni-Vanuatu Small Business Development Fund (NVSBDF) and its name on the 21st August, 2006. During the launching he acknowledged the Chinese Government for its assistance in establishing the micro-finance. The launching was not only significant but timely in that indigenous Ni-Vanuatu are now encouraged to apply for the micro-finance scheme in other areas provided within the new Constitution. The Ni-Vanuatu Business Minister also explained that the constitution was the guideline for the board members of the Ni-Vanuatu Micro-finance Scheme and also as a guideline to interested members.

27 August, 2006

2. One of the first-ever held events during the month was the Port Vila on Sale trade fair over a three day period from Monday 14th through to Wednesday 16th August, 2006. Organizing committee includes the Chamber of Commerce and Industry (CCI), Port Vila Municipality, volunteers, and business houses along with the gratitude of the Australian High Commission sponsorship of tents as stands which housed and displayed huge range of local products from INTV, Melanesian Furniture, Vanuatu Volcanic Ash, etc. There were also impressions of this event becoming an annual event. This Port Vila on Sale comes as an initiative from the CCI as a promotion of Vanuatu-made products.

20 August, 2006

3. The Vanuatu Government has given Air Vanuatu a cheque of VT 150 million as part of total VT360 million needed by the airline for a company refinancing project that includes the leasing of a new Boeing 737-800. The loan will be at a preferential interest rate of just 6% as advised by the Minister of finance, Willie Jimmy. The government support the airline has come at a time when Air Vanuatu is facing financial pressure as a result

30 August, 2006

of heavy maintenance bills and rising costs. According to the General manager of Air Vanuatu, in an exclusive interview, the airline run into a financial situation in 2006 as a result of high maintenance costs on the Boeing and the ATR43 still in New Caledonia awaiting repairs to fix corrosion. The Airline will receive assistance from China with the donation of a 17-seat Y12 Chinese version of a Twin Otter aircraft. In addition, the new Boeing 737-800 coming in March 2008 will increase seat capacity by 35%.

4. The first ever "National Land Summit" was held at Port Vi la from the 25th – 29th September, 2006, officially opened by the Head of State Kalkot Mataskelekele. Coordinator for the Land Summit, William Ganileo said that the theme of the Land Summit is "Sustainable land management and fair dealings to ensure progress with equity and stability". Among Local participants, outside speakers were also invited including presentations from Land officers, Real Estate representatives, Malvatumauri council of Chiefs, land developers and land owners, with the Land Summit formatted with panel discussions which run for the whole of the given days. Participants also called on the Government and the Parliament to change the existing land laws to favour the indigenous people of Vanuatu amongst other relevant issues regarding land policies. (Daily Post, 26th September, 2006)
